and The Best Gift to Yourself
is A Little Attention and Love"*

LASER TREATMENTS

Laser treatments are done by repeating the pulses of light beams onto an area of targeted skin. The laser works in two different ways. Firstly, it destroys the outer layer of damaged skin by allowing new skin cells to develop in its place. Secondly, the heat from the laser highly encourages collagen production, which is a protein to keep skin tight and smooth.

NAIL TREATMENTS

We at our Dr. Aarathi's Clinic provide nail treatment by actively engaging in offering premium nail care services by cleaning and exfoliating the dead skin for our patients. Our professionals provide treatments that are more effective for improving the quality of the nails.

COSMETIC TREATMENTS

Dealing with acne, pimples, wrinkles, dark spots, scarring, and discoloration on your face can be incredibly frustrating. Luckily, we at Dr. Aarathi's Clinic have increased the non-surgical skin treatments that work smoothly on your skin, even out your skin tone, prevent further acne, pimples, scars, dark spots, wrinkles and fine lines.
